# HOW SOLID IS YOUR FORTRESS? PENTESTING SOLUTION

✓ ATTACK   ✓ ASSESS   ✓ ADVISE

[www.gds.com.lb](http://www.gds.com.lb)

Operating telecom networks since 1996, GDS has always provided its customers a seamless protection solution and uninterrupted service being at the frontline of Cyber Defense. With the penetration testing service, GDS is putting at the disposal of its customers the same techniques and expertise used to assess the resilience of its own network.

## OUR APPROACH

- ⇒ Understand your requirements through a technical meeting to determine the penetration test scope.
- ⇒ Present a proposal based on the information gathered from the requirements stage.
- ⇒ Perform the penetration testing remotely or on-site and coordinate with you during the process execution.
- ⇒ Provide a detailed report of the findings and rating the discovered vulnerabilities including general recommendations.

## WHY A PENTEST?

- ⇒ Prevent breaches by assessing the existing vulnerabilities in the pentest target.
- ⇒ Provide compliance in case it is required as part of a regulatory environment.
- ⇒ Assess the performance of existing security controls.
- ⇒ Assess the security of applications and systems.
- ⇒ Assess the security team's operational response (performance) to incidents.
- ⇒ Get an overall score on your security stance.

## KEY BENEFITS

- ⇒ Discover risks before they affect your business.
- ⇒ Validate security procedures and security team response protocols.
- ⇒ Improve security awareness.
- ⇒ Assess the security of applications and systems.
- ⇒ Optimize investment in Cyber Security by focusing on the weaknesses.
- ⇒ Identify vulnerabilities that are impossible to detect through automated security systems.

## WHAT DO WE TEST?

Web application

Infrastructure

Embedded devices & IOT

Servers

Mobile application

WiFi Network

Dedicated Hardware

Database
